Web Design

About Me

As a UI/UX Designer, I am a creative and detail-oriented individual with experience in designing user interfaces and user experiences for web and mobile applications.

My skills in visual design, wireframing, and user research have allowed me to create intuitive and engaging designs that not only meet the needs of the user, but also align with the goals of the business.

My ultimate goal as a UI/UX Designer is to create meaningful and impactful experiences for users, providing them with seamless and enjoyable interactions that meet their needs and exceed their expectations. I am constantly keeping up with the latest design trends, industry best practices, and emerging technologies to stay at the forefront of my field and deliver innovative solutions.

Projects

Domino –
The scoring app for gamified dominoes is designed to enhance the user experience and engagement of players while playing the game. It serves as a digital companion for dominoes enthusiasts, providing them with a convenient and intuitive way to keep track of scores, manage game statistics, and participate in a gamified environment

SeedBloom –
This plant-based e-commerce app is a mobile application that allows users to browse, purchase, and receive delivery of plant-based products. These apps cater to individuals who follow a vegan, vegetarian, or plant-based lifestyle and offer a wide range of plant-based foods, beverages, supplements, and other related products.
